

LTI 250 Touch

Mobile dispensing system with 7' screen

Smart mobile
dispensing system

LTI 250 Touch

**Mobile dispensing system
with 7' screen**

**One system. One tap.
Endless pouring possibilities.**

Meet the LTI 250 Touch – a powerful, mobile dispensing system with a capacity of 250 liters per hour, which combines advanced technology, maximum ease of use, and complete flexibility to suit customer needs.

The device is equipped with a 7-inch color touchscreen and a single smart pouring faucet, capable of delivering a wide variety of beverages at the touch of a button: juice, flavored smoothies, flavored sparkling water, cold water, and soda – all from one compact, portable system.

Thanks to its mobile structure on wheels, the system does not require the installation of a kitchen, counter or complex infrastructure, and can be quickly and conveniently placed almost anywhere. The solution is ideal for factories, dining rooms, halls, visitor centers, institutions, conferences and events, as well as for any organization interested in providing a wide variety of beverages to a large number of users in an efficient and impressive manner.

Variety of flavors

One pouring tap for a wide variety of drinks

Touch

Advanced 7-inch touchscreen

Super experiential

Innovative, fast and intuitive user experience

4 in 1

Option for water, soda, juices and flavored water in one system

Advanced cooling system

High cooling output of up to 250 liters per hour

Quantitative supplier

Suitable for a large number of users throughout the day

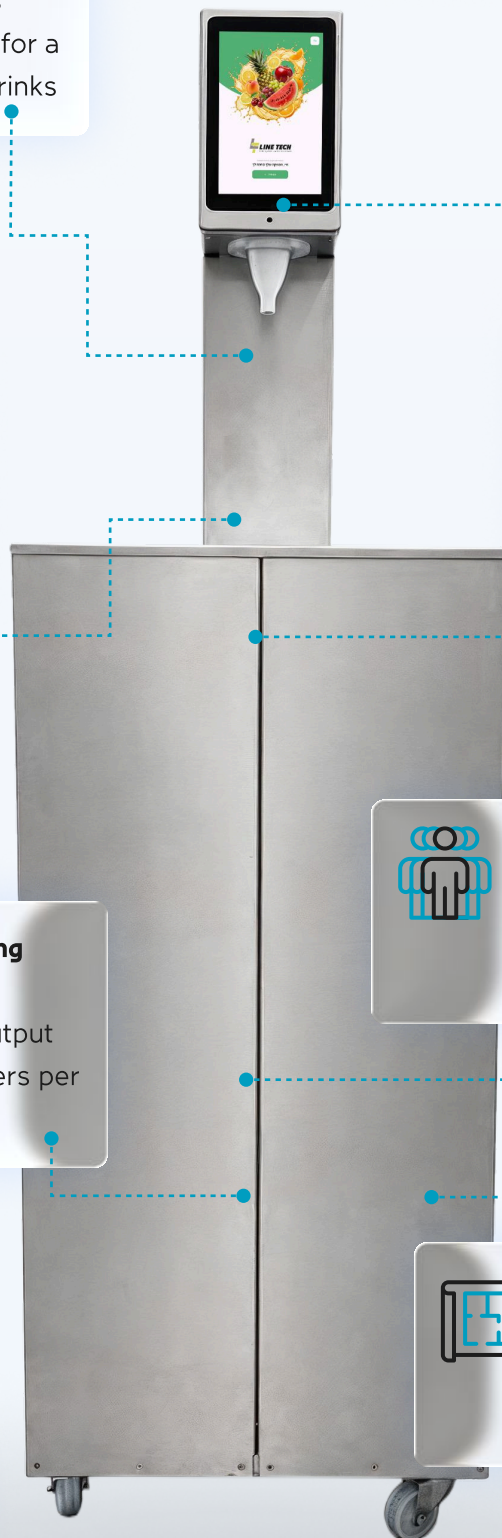

Goes everywhere

Space-saving and no need for a dedicated counter or kitchen

Wherever you want

Completely portable – on wheels for easy and convenient transportation

LTI 250 Touch

Countertop dispensing system with 7-inch screen

System features:

- System suitable for a variety of beverage types.
- Easy and convenient maintenance.
- Powerful and efficient compressor – cooling with ice bank technology.

Maximum working pressure	400 kilopascals / 4 bar
Cooling system supplier	450W
General nominal power	550w
Gas type	Environmentally friendly gas – R290
voltage	230V / 50-60Hz
Climate level – Tropical	IPX1
weight	26 kg
Dimensions	Height 147 cm / Width 42 cm / Depth 42 cm

Mixing Tower 7'

Compact and luxurious design that makes optimal use of installation space. The pumping system built into the pouring tower allows for direct connection to the juice or syrup tanks, so that only minimal storage space is required. The solution is ideal for businesses that want to maintain an organized, clean and equipment-free work environment.

Tower dimensions

height:	47.5 cm
width:	13 cm
depth:	6 cm
Height from the spout (without excess tray):	21.5 cm
Touch screen:	7 inch colorful

Pouring options

1. Cold water
2. Warm water
3. Soda
4. Up to 2 flavors to choose from – juice or sparkling

System advantages

- Automatic washing of the pouring pipes twice a day – to maintain the cleanliness, hygiene and quality of the drink over time.
- Automatic washing and maintenance system – reduces the need for manual maintenance and ensures proper operation of the system.
- Advanced and user-friendly graphic interface – simple and convenient operation via touch screen.
- Support for multiple languages – adaptation to a wide range of users.
- Remote support and control – diagnosing faults and providing service without the need to arrive at the location, if possible.
- Remote software updates – upgrading the system and adding new capabilities on an ongoing basis.
- Intelligent quantitative pouring – options for defining pouring amounts in advance according to the customer's needs (cup, pitcher or customized volume).
